Former Security Researcher, Factorial.hr

MD. Fazle Rabbi

Jr. Offensive Security Engineer at TKCL

ABOUT ME

I'm MD Hasan, a cybersecurity researcher and bug hunter focused on access control vulnerabilities, penetration testing, and web application security. Passionate about uncovering security flaws, exploiting complex logic issues, and improving defenses through hands-on research, I continuously sharpen my skills in the ever-evolving field of cybersecurity.

EXPERIENCE

Independent Bug Bounty Researcher

Remote | 2022 – Present

- Conducting security research across bug bounty platforms, identifying vulnerabilities in real-world applications.
- Reported 200+ valid vulnerabilities on HackerOne and multiple findings on YesWeHack.
- Specialized in Access Control flaws: IDOR, RBAC bypass, privilege escalation, and business logic vulnerabilities.

ACHIEVEMENTS

- Reported 200+ valid vulnerabilities on HackerOne with 1,400+ reputation points.
- HackerOne Quarter Ranker #1 (2 times) and 3rd position in Bangladesh region.
- Ranked #9 in HackerOne Bug Hunt 2026 (Bangladesh).
- Appreciated by a private responsible disclosure programme; Quarter rank holder on a responsible disclosure programme — top 18th.
- Badges: Access Control (HackerOne), Client-side (YesWeHack).
- Awarded by Bugcrowd for Finance security contributions.
- Discovered critical vulnerabilities across multiple responsible disclosure programmes on HackerOne, Bugcrowd, and YesWeHack.
- Extensive experience finding Broken Access Control, CSRF, XSS, Authentication Bypass, and business logic violations across HackerOne, Bugcrowd, YesWeHack, Intigriti, and responsible disclosure programmes.

EDUCATION

Dhamrai Govt. University College

Bachelor of Soil Science (CGPA: 3.31)

Ashulia College

Higher Secondary Certificate (GPA: 4.17)

Icharkandi High School

Secondary School Certificate (GPA: 4.64)

KEY SKILLS

- Access Control: IDOR, Broken Access Control, RBAC Bypass
- Vulnerability Assessment & Penetration Testing (VAPT)
- Web Application Security Testing
- Bug Bounty: HackerOne, Bugcrowd, Intigriti, YesWeHack
- XSS, SQL Injection, CSRF, Broken Authentication
- Red Teaming: Reconnaissance, Enumeration, Exploitation
